c. Management had not reconciled forward-looking non-GAAP measures to their most directly comparable GAAP measures of Gross Profit and Net Income. For these reasons, management is unable to assess the probable significance of the unavailable information, which could materially impact the amount of the directly comparable GAAP measures.

2024 Financial and Business Outlook ^{g h i}

Privia Health's key actions and areas of focus in 2024 include:

- Increasing density and scale in existing geographies through organic provider growth;
- Limiting downside-risk arrangements in a challenging Medicare Advantage (MA) market;
 - Renegotiating MA capitation arrangements for more favorable contract structures and margin contribution expected to reduce capitated practice collections by approximately \$198 million year-over-year due to revenue recognition rules as 19,900 attributed lives move to upside/downside risk arrangements;
 - Exiting Delaware ACO (~12,000 attributed lives in the Medicare Shared Savings Program), effective January 1, 2024;
- Achieving operating leverage to drive Adjusted EBITDA growth, and converting 80% of Adjusted EBITDA to Free Cash Flow (defined as net cash provided by operating activities less purchases of property and equipment); and
- Continuing to pursue business development efforts to enter new states and increase overall addressable market.

The Company's 2024 operating and financial guidance is as follows:

(\$ in millions)	FY 2023	FY 2024 Guidance ^g		Y-Y % Change from FY 2023	
	Actual	Low	High	Low	High
Implemented Providers	4,305	4,650	4,750	8.0%	10.3%

Adjusted EBITDA ^h	\$ 72.2	\$ 85	\$ 90	17.7%	24.6%

- Practice Collections guidance includes reduction of approximately \$198 million from renegotiated Medicare Advantage capitation agreements, and assumes minimal year-over-year increase in Shared Savings accruals
- Adjusted EBITDA guidance includes approximately \$10-12 million in start-up costs for new geographies announced in last 15 months
- Capital expenditures are expected to be less than \$1 million in full-year 2024
- Approximately 80% of Adjusted EBITDA expected to convert to free cash flow in FY 2024
- Effective tax rate expected to be approximately 27-28%

g. Management has not reconciled forward-looking non-GAAP measures to their most directly comparable GAAP measures of Gross Profit and Net Income. This is because the Company cannot predict with reasonable certainty and without unreasonable efforts the ultimate outcome of certain GAAP components of such reconciliations due to market-related assumptions that are not within our control as well as certain legal or advisory costs, tax costs or other costs that may arise. For these reasons, management is unable to assess the probable significance of the unavailable information, which could materially impact the amount of the future directly comparable GAAP measures

h. See "Key Metrics and Non-GAAP Financial Measures" for more information as to how the Company defines and calculates Implemented Providers, Attributed Lives, Practice Collections, Care Margin, Platform Contribution and Adjusted EBITDA, and for a reconciliation of the most comparable GAAP measures to Care Margin, Platform Contribution, Adjusted EBITDA, Adjusted Net Income and Adjusted Net Income Per Share.

Certain non-recurring or non-cash and other expenses will be treated as an add back in the reconciliation of Net Income to Adjusted EBITDA, and the reconciliation of Net Income to Adjusted Net Income and Adjusted Net Income Per Share, the details of which can be found in the Reconciliation schedules near the end of this and in future quarterly financial press releases.
