Forward-Looking Statements

This presentation contains forward-looking statements that express the Company's opinions, expectations, beliefs, plans, objectives, assumptions or projections regarding future events or future results that include, but are not limited to: 2021 financial guidance and other projections and forecasts. These forward-looking statements involve a number of risks, uncertainties (some of which are beyond the Company's control) or other assumptions that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements. These risks and uncertainties include, but are not limited to, those factors described in filings with the Securities and Exchange Commission ("SEC"), including those under "Risk Factors" therein. Should one or more of these risks or uncertainties materialize, or should any of the assumptions prove incorrect, actual results may vary in material respects from those projected in these forward-looking statements. Forward-looking statements speak only as of the date made. The Company does not undertake any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

Use of Non-GAAP Financial Information

In order to provide investors with greater insight, promote transparency and allow for a more comprehensive understanding of the information used by management in its financial and operational decision-making, the Company supplements its condensed consolidated financial statements presented on a GAAP basis herein with certain non-GAAP financial information, including: Care Margin; Platform Contribution; Platform Contribution margin; Adjusted EBITDA; and Adjusted EBITDA margin. Reconciliations of these non-GAAP measures to their most directly comparable GAAP measures are included in the financial schedules in the Appendix of this presentation, as well as in the Company's quarterly financial press releases and related Form 8-K filings with the SEC. This information can be accessed for free by visiting www.priviahealth.com or www.sec.gov.

Management has not reconciled forward-looking non-GAAP measures to its most directly comparable GAAP measure of Operating Income and Net Income. This is because the Company cannot predict with reasonable certainty and without unreasonable efforts the ultimate outcome of Care Margin, Platform Contribution or Adjusted EBITDA due to market-related assumptions that are not within our control as well as certain legal or advisory costs, tax costs or other costs that may arise. For these reasons, management is unable to assess the probable significance of the unavailable information, which could materially impact the amount of the future directly comparable GAAP measures.

APPENDIX

Proven, Scalable and Flexible Operating Model

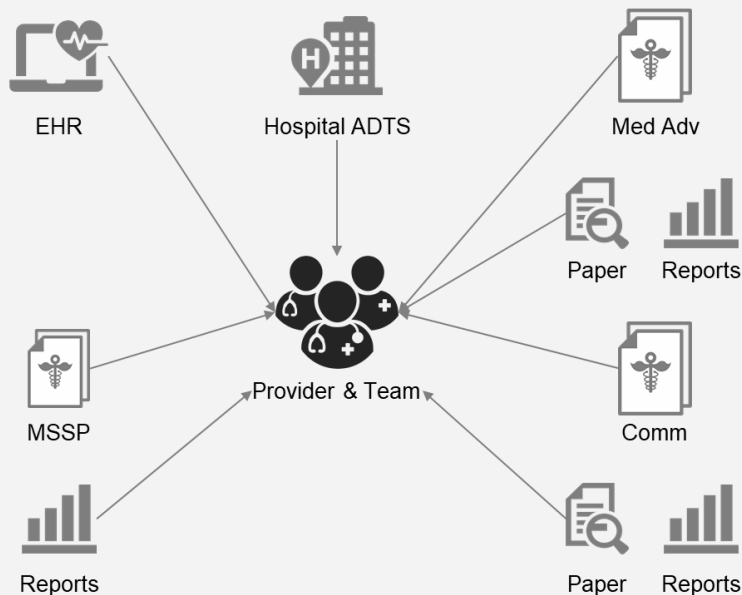

- Single Tax-ID Medical Group in each local market– a primary care centric delivery network in each market
- Management services and clinical organization enabled by the Privia Technology Solution
- Market specific strategies —Accountable Care Organizations and ancillary services based on market dynamics
- Recognize practice collections across all of our providers
 - Under fee-for-service contracts, Privia keeps a percentage of total collections
 - Under value-based care constructs, Privia collects a per member per month (“PMPM”) fee and a portion of the shared savings generated

The Privia Technology Solution Creates an Integrated Experience for Providers and Patients

Old Way

Confusion and disorganization as a result of an onslaught of information from disparate sources

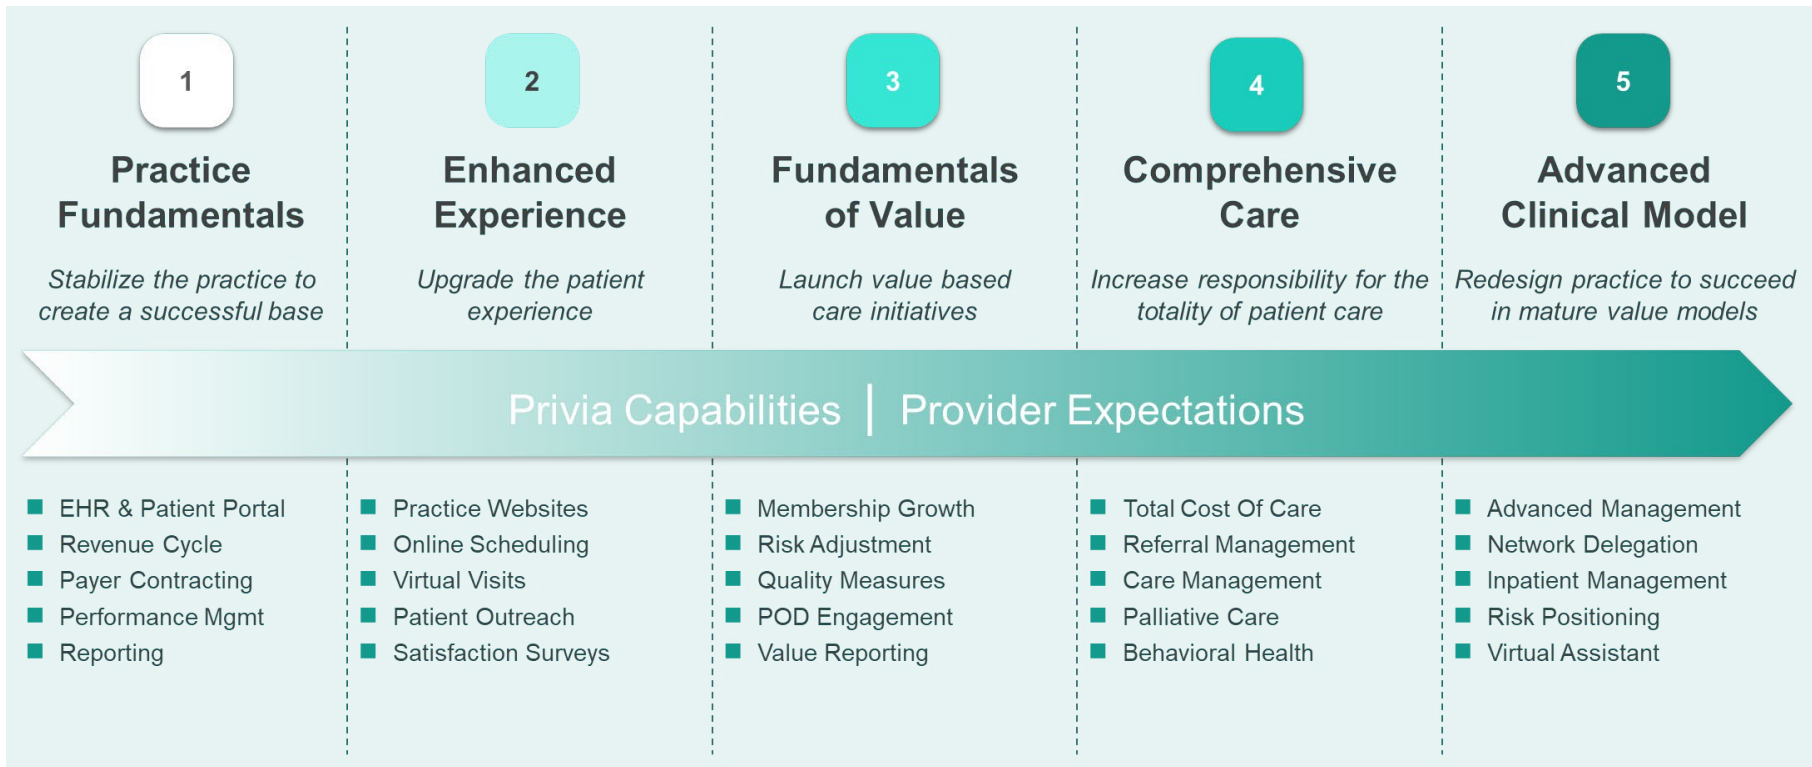

The Privia Way

Privia manages complexity to create a unified workflow and experience for providers, staff, and patients

The Privia solution acquires data from across the healthcare ecosystem for a single view of the patient

Methodical Process Helps Providers Move Towards Value

Privia's VBC Initiatives Differ From Other Models

- Value-based care participation across all programs: Commercial, Medicare Advantage, Medicare and Medicaid
- Scaled and growing: ~721,000 attributed lives across 70+ risk arrangements
- Significant opportunity to move attributed lives into full-risk arrangements over time
 - Enables providers experienced primarily in fee-for-service to transition thoughtfully and profitably to value-based care
 - Interests aligned with provider groups sharing upside/downside risk with Privia
- Practice Collections & Revenue reflect shared savings, not premium MA dollars / costs under management
- Privia leadership has decades of experience in managing and underwriting risk

Case Study: Driving Performance for Physician Group “A” Partnership

■ Physician group A joined Privia in 2014 with several objectives in mind:
